

## Lunchtime Conversation at the Club

The University Club at Penn and the Association of Senior and Emeritus Faculty (ASEF) co-host this event.

**Monday, November 09**

12noon

In the Hourglass Room at the Club

**Age related macular degeneration (AMD):  
Epidemiology, classification, features, diagnosis, treatment  
presented by **Stuart Fine****

Stuart Fine is the Professor and Chair of the Department of Ophthalmology in the School of Medicine and Director of the Scheie Eye Institute.

Dr. Fine came from the Johns Hopkins University to become chair of Penn's Department of Ophthalmology in 1991. He brought with him a keen interest in public health and epidemiology, which he has made a focus of the department as it moves into the 21st century. The Department also has shifted some of its research resources toward molecular medicine (genetics) in response to the growing awareness of the role of heredity in determining our destiny. Dr. Fine received a lifetime achievement award from the American Academy of Ophthalmology in 2006.

The event starts at 12noon in the Hourglass Room and is open to all University Club and ASEF/PASEF members only. If you plan to have lunch, please arrive early - anytime after 11:30am - to avoid any delays. The regular Club lunch buffet will be available.
